- Main Battery.

## VIDEO + DATA DISPLAY

## Universal Commander Unit

The ultimate goal nowadays is to integrate all of the logistics operations in a single universal command, control, and communication unit that provides full situational awareness capabilities to the squad's or platoon's commander. JELS has designed a commander unit that tracks this goal by projecting all the relevant position data and status of the team members online over the display map.

The features of this unit are:

- Comprehensive Situational Awareness.
- Messaging Capability.
- Location of Friendly Forces.
- Different Types of Maps Can Be Selected as Reference Background.
- Display Can be Used for Video Monitoring and Playback.
- Robust Structure.
- Integrated Battery.
- Handheld or Fixed in any Vehicle using Special Docking.
